

2016 - 2017

# Curriculum *in the* Middle Schools

*Excellence Without Exception*

## PRINCIPALS

### **Bristow Middle School**

Mr. Steven Cook, Principal

Mrs. Jacqueline Colon, Assistant Principal

### **King Philip Middle School**

Ms. Joy Wright, Principal

Mr. Justin Gusy, Assistant Principal

Mr. Marc Kotler, Assistant Principal

### **Sedgwick Middle School**

Mr. Andrew Clapsaddle, Principal

Ms. Melissa Behrens, Assistant Principal

Mr. Frank Cardona, Assistant Principal

50 South Main Street, West Hartford, CT 06107

(860) 561-6631

*What Your Child Will Learn In*

**Grade  
7**

Dear Families,

It is a pleasure to share our 2016 - 2017 *Curriculum in the Middle Schools*, a brief overview of all areas of the Grade 7 West Hartford Curriculum. In this brochure, you will also find descriptions of our Unified Arts program, School Counseling, Library Media Services, and Gifted Programs. Our curriculum is based on the Connecticut Core Standards and provides instruction on the essential skills and understandings necessary for success on both district and state assessments.

Inherent in our curriculum is the belief that every student can and should learn. Instructional strategies that your child will experience include but are not limited to: collaboration, active and direct learning, problem solving, guided discovery, independent activities, and differentiation.

This curriculum comes alive in the hands of our talented teachers who are committed to ensuring that our students reach their highest potential. We are dedicated to accommodating children's diverse needs, the way they learn, their experiences and interests, and to facilitating continuous educational growth. If you should have any questions about your child's curriculum, your classroom teacher is the best source of information.

No single document can fully explain the rich and complex nature of the school curriculum and instructional goals. We know that learning is optimized in a partnership with families, teachers, and schools. Working together, we can use your experiences as a family and our work in the classroom to create a respectful climate of academic success, healthy personal and social development, and joy for lifelong learning.

Sincerely,

Paul W. Vicinus, Jr.

Assistant Superintendent for Curriculum, Instruction and Assessment

## **BOARD OF EDUCATION**

Mark Overmyer-Velazquez, Chairperson

Tammy Exum, Vice Chairperson

Carol A. Blanks

Cheryl Greenberg

Dave Pauluk

Jay Sarzen

Mark Zydanowicz

## **ADMINISTRATION**

Tom Moore, Superintendent

Andrew Morrow, Assistant Superintendent for Administration

Paul W. Vicinus, Jr., Assistant Superintendent for Curriculum, Instruction & Assessment

Richard Ledwith, Executive Director of Human Resources

Kerry Jones, Director of Elementary Education

Anne T. McKernan, Director of Secondary Education

Gretchen Nelson, Director of Pupil Services

Roszena Haskins, Director of Continuing Education and Diversity Advancement

# Curriculum in the Middle Schools

What Your Child  
Will Learn In

## Grade 7

### English Language Arts

Students entering seventh grade will have read literature from many standpoints: in connection with history, science, and the arts, in pursuit of answers to a question, in consideration of a theme or literary element, and as a way of gaining insight into human existence. Students will have read and responded to literature of various genres. They will apply this prior knowledge as they explore the year's overarching theme of the search for self-identity.

Seventh grade students will study human nature, human rights, and the purposes of argument through a wide variety of fiction and non-fiction texts. Through the careful analysis of classic and contemporary literature, such as Greek myths or *The Giver*, students will explore a variety of topics such as immigration, the quest for self, and the power of the individual. Students will weigh the value of individual freedom and choice; they will also become familiar with literature from different perspectives and develop connections between the modern world and literary works.

In addition, the year will center on three types of writing: narrative, expository, and argument. Students will engage in the writing process including the use of graphic organizers, drafting, and peer/self-revision to publish their work. In their literary analysis, research essays, narratives, and oral presentations, students will draw on multiple sources, including literary, informational, and multimedia texts. Students will write in a variety of genres including response to literature, narrative, persuasive, and expository as they develop writing portfolios. Students will continue to develop their vocabulary while investigating unfamiliar words from literature and using them in their own working vocabulary. Additionally, students will advance their communication skills as they explore various methods of presentation, including multimedia. Students will also strengthen their argumentation skills, exhibiting these in class discussions, debates, and presentations.

By the end of seventh grade, students will have a deeper understanding of the power of the individual and a refined sense of self. With this knowledge of self, they will be ready to critically examine the role of the individual and society through increasingly complex works of literature.

### World Languages

The World Language Curriculum incorporates the National Standards and the State of Connecticut Frameworks for World Languages. Students continue their selected study in either Chinese, French, or Spanish. Our program goals focus on:

- **Communication:** to use language in three modes: interpersonal, interpretive and presentational
- **Cultures:** to understand cultures through products, practices and perspectives of speakers of that language
- **Connections:** to understand relationships of language to other disciplines and new frontiers
- **Comparisons:** to develop insight into one's own language and culture as well as those of the new language
- **Community:** to apply language beyond the classroom in a global setting

In all grades, emphasis is placed on development of oral and written communication skills; links to other disciplines are encouraged.

In grade 7, the skills of listening, speaking, reading, and writing are expanded and a text is introduced to support essential grammatical concepts. Students are able to talk about school and leisure time activities, their likes and dislikes, and can engage in more complex social interactions. Emphasis is placed on understanding Chinese, French, and Spanish cultures.

### Mathematics

The Middle School Mathematics Grade 7 Curriculum incorporates the Connecticut Core Standards for Mathematics (CCS-M). The program goals focus on the following content domains:

- Ratios and proportional relationships
- The number system
- Expressions and equations
- Geometry
- Statistics and probability

In all grades, the following mathematical practices are integrated throughout the program:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

In grade 7, the major themes include extension of understanding and application of proportions, integers, rational numbers, constructions of geometric figures, angle measure, random sampling, population comparisons, and probability. In addition, contextualized mathematical problems using numerical and algebraic expressions and equations are solved.

### Science

In grade 7, science students further their exploration of the life sciences through readings, class-room discussions, lab activities, projects, and experiments. Students engage in performance tasks which involve the design and implementation of experiments focused on specific questions or problems. Our curriculum is based on the National Science Education Standards and the State of Connecticut Grades 6-8 Science Frameworks. The course includes the content and skills to be assessed by the grade eight science CMT including the state's curriculum embedded performance task, "Feel the Beat," during which students investigate the effect of movement and other variables on pulse.

During seventh grade, students will explore the following concepts and skills:

- **Science Experimentation:** Students perform lab experiments and utilize science investigational skills including predicting, observing, measuring, graphing, interpreting, analyzing, synthesizing, and evaluating.
- **Cell Biology:** The characteristics of living things, the structure and function of cells, and cell processes such as respiration, photosynthesis, mitosis, meiosis, and osmosis.
- **The Human Body:** Levels of organization (cells, tissues, organs, systems, and organisms) and selected human body systems (i.e., skeletal, muscular, digestive, circulatory, respiratory, nervous, and reproductive).
- **Heredity and Genetics:** The principles of genetics, the structure and function of chromosomes and genes, DNA and RNA, and the inheritance of traits.
- **Ecology:** Food webs, nutrient cycling, the effect of septic and sewage systems on the quality of surface and ground water, and the impact of human activity on Connecticut water resources such as local ponds, rivers, and the Long Island Sound ecosystem.

### Social Studies

The purpose of history and social studies is to prepare students to ask and seek answers to meaningful questions and prepare them with the knowledge, skills, and dispositions to become informed participants in an ever-changing global community and to act responsibly to improve its condition. The social studies curriculum is aligned with the national College, Career, and Citizenship (C3) frameworks as well as the Connecticut state social studies curriculum frameworks. Key disciplinary content and skills, as well as core literacy standards for reading, writing, speaking and listening are embedded within our curricula. Our curriculum is driven by student inquiry and requires students to engage with compelling questions in order to understand the world around us and take informed action based on their learning.

In addition to disciplinary content, students are equipped with the tools necessary to engage in inquiry. In particular, students will learn to:

- Recognize, develop, and articulate compelling questions.
- Gather and evaluate sources and then use evidence to understand the complexity of multiple social studies topics.
- Explore multiple perspectives to develop their own understanding of history and social studies topics.
- Engage in conversations and share their understandings of the world around them.

The seventh grade social studies program builds upon the concepts and skills developed in the sixth grade. Specific areas of study include the Middle East, Africa, Asia and ancient Greece and Rome. Through the development of key social studies skills each student will be encouraged to "think like a historian". Critical reading and research skills are further developed through the study of both historical and contemporary issues. All students in the seventh grade take part in a guaranteed research experience through their social studies class.

### Library Media Services

The library media program in the middle school continues to build on the foundation skills taught in grades K-5 for students to become critical users of information and readers for lifelong learning. *Standards for the 21st-Century Learner* published by the American Association of School Librarians provides the framework for instruction. By the end of grade 8 students will:

- Evaluate information found in selected sources on the basis of accuracy, validity, appropriateness for needs, importance, and social and cultural context.
- Demonstrate adaptability by changing the inquiry focus, questions, resources, or strategies when necessary to achieve success.
- Respect copyright/intellectual property rights of creators and producers.
- Continue an inquiry-based research process by applying critical thinking skills (analysis, synthesis, evaluation, organization) to information and knowledge in order to construct new understandings, draw conclusions and create new knowledge.
- Use the writing process, media and visual literacy and technology skills to create products that express new understandings.
- Use technology and other information tools to organize and display knowledge and understanding in ways that others can view, use, and assess.
- Show an appreciation for literature by choosing to read for pleasure and expressing an interest in various literary genres.

### Unified Arts

Our middle school students participate in 36-day unified arts rotations in the areas of physical education, music, art, health, and technology education in grades 6 through 8. The following pages include descriptions of the curriculum. Below please find a sample student schedule of Unified Arts courses throughout the grade 7 year.

	Morning	Afternoon
Rotation 1	PE	Art
Rotation 2	Health	Music
Rotation 3	Tech Ed	PE
Rotation 4	Art	Health
Rotation 5	PE	Tech Ed

Note: The Unified Arts Program is delivered slightly differently at Bristow Middle School where there are 6 rotations, each lasting for 30 days. The UA curriculum and the courses are identical to the other two middle schools with the only difference being that at Bristow, physical education and health are combined into one course of study called "Wellness." Every student will be in a wellness rotation at any given time throughout the year.

### Music

The middle school music curriculum includes classroom instruction for all students in grade 7 and is aligned with State and National Standards to ensure a comprehensive and sequentially appropriate experience. The elective program includes band, orchestra, and choral ensembles. Further extension and enrichment of the curriculum is offered through co-curricular ensembles: jazz band, select string, and vocal ensembles.

#### Performance Ensembles

Performance ensembles focus on building individual and ensemble skills through a broad selection of music literature. Components include:

Blend	Ear Training	Posture
Bow Control	Expression	Sight Reading
Breathing	Intonation	Tone Quality

Instrumental students also receive small group instruction focusing on individual technique within a specific instrument grouping.

#### Classroom Instruction

Students study American music, with an emphasis on African-American music. Students continue to develop vocal techniques and musicianship skills through singing, reading and writing music, improvisation and critical listening.

### Visual Arts

The middle school curriculum, like that of the elementary and high school levels, encompasses art production, art history, aesthetics, and art criticism. The content and processes are shared among these four components. In addition, all processes and concepts addressed through this program foster visual literacy skills. Students produce works of art that express their personal experiences and reflections about different cultures and artists.

The curriculum is grounded in the State and (1994) National Standards to ensure that high expectations for student learning are maintained. Within the curriculum there are required concepts, artists, cultural time periods, vocabulary, techniques, and processes to be mastered by students at each grade level. The curriculum is currently being revised using the National Core Arts Standards DRAFT (2015) (NCAS) as a guide.

Middle school students have the opportunity to experience many art forms such as:

Drawing, painting, printmaking, graphic design, technology applications, textiles, and architecture.

Listed below are suggested artists/cultural artistic periods. Every teacher may add to these with additional artists/cultures.

*(Sample assignments appear in italics)*

- Optional: René Magritte
- African Art, Native American Art, Ancient/Egyptian Art
- *Perspective drawing, 3-dimensional artwork, observational drawing, printmaking, painting, portraiture, collage*

### Technology & Engineering

**STEM: Science → Technology → Engineering → Math**

*Helping student's gain the skills required to succeed in today's challenging world including critical thinking, problem solving and the ability to drive advancements in STEM. The Technology & Engineering Department puts the "T&E" in STEM.*

**Our program goals seek to enable students to:**

- Advance technological and information literacy
- Apply creative problem solving and critical thinking skills within the design process
- Understand the impacts of technology on society
- Collaborate to enhance experiential learning and communication in a diverse environment
- Develop STEM career awareness and exploration

#### Focus: Engineering, Manufacturing and Robotics

Through the exploration of engineering and manufacturing, 7th grade Technology & Engineering students use the engineering design process to discover the world of modern manufacturing and the field of robotics. The units of study include technical design through CAD, manufacturing processes, the safe use of equipment within a production environment, robotic design, assembly and programming, and coding within computer science principles.

### Health

Health education emphasizes students developing healthy lifestyles.

Fundamental to developing healthy lifestyles are opportunities to learn to apply health literacy skills. These skills include decision making, goal setting, effectively communicating, accessing information and resources, analyzing what influences our actions, and advocating a healthy position. These align with National and State Standards.

Students practice these skills using different health contents. The major topics are listed below.

- Nutrition and physical activity
- Alcohol and marijuana
- Violence prevention, bullying, harassment, sexual harassment, cyberbullying
- Reproductive systems, AIDS

### Physical Education

The goals of physical education are for students to develop fitness and skills in the movement areas of dance, adventure education, and sports. An integral part of physical education is the development of the responsible and respectful behaviors in both cooperative and competitive activities. The sequential and varied experiences contribute to the total well-being of each student. Concepts, strategies, rules, sportsmanship, teamwork, and basic movement skills are all woven into the offerings. After-school intramurals provide additional times for students to participate in fitness activities according to their interests.

Seventh grade students will participate in a number of activities that may include the following:

- Adventure Education
- Invasion sports (basketball, field hockey, flag football, lacrosse, team handball)
- Dance
- Fitness
- Net sports (badminton, pickleball, speedminton, tennis, volleyball)
- Softball

A change in clothing is required for healthy participation. Shorts, t-shirts, sneakers, and warm-up suits for colder weather are appropriate attire.

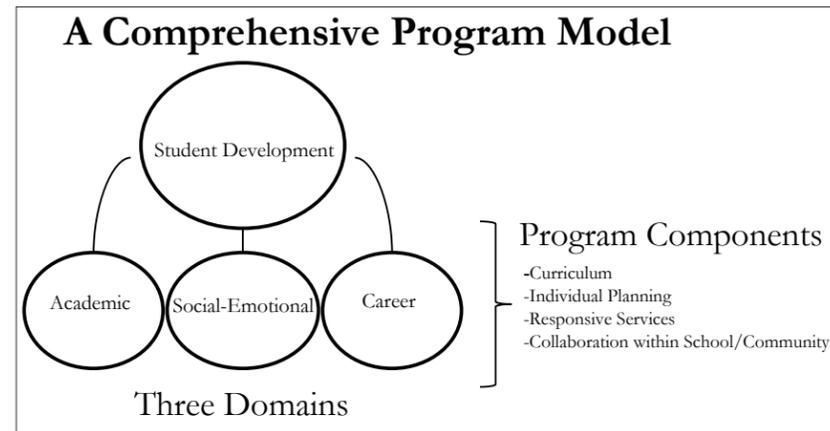

### Support Services

Special Education, ESOL (English for Speakers of Other Languages), remedial reading services, and math support are available for students who may need them.

### School Counseling

#### Program Model

A comprehensive school counseling program model is planned, preventative and measurable. It is based on developmental theory and designed to meet the needs of all students as they progress from grades K-12. Content standards define what students should know and/or do at each grade level and provide a scope and sequence for program implementation.

#### Service Delivery

School counselors provide skills and experiences that promote student academic, social-emotional and career development. These skills and experiences are provided through both **Direct** and **Indirect** services and define the nature and role of today's school counselor.

**Direct Services** are face-to-face interactions between the counselor and students.

Examples include:

- Implementing (teaching) the school counseling curriculum
- Goal Setting
- College and Career Readiness Activities
- Individual/Group Counseling
- Crisis Intervention and Responsive Services

**Indirect Services** are interactions the counselor has with others on behalf of students.

Examples include:

- Advocacy to ensure equitable access and opportunities for all students
- Consultation with parents, school-based personnel and community agencies
- Collaboration within and outside the school community
- Program coordination and management
- Leadership initiatives to enhance student learning and promote healthy development

### Enrichment – QuEST

The QuEST Program in the middle schools is a continuation of the school-wide Gifted Program that begins at each elementary school in fourth grade. QuEST's student population at the middle schools is comprised of students identified for program participation during their elementary or middle school years. A student who is nominated for QuEST in the middle school is reviewed by the student's team of teachers, the QuEST teacher, and program coordinator before a final determination is made. Middle school students recommended by a content area teacher for independent research, group problem-solving activities, and other QuEST opportunities may also participate.

The program offers a variety of options for challenging the learning of these highly capable students.

- Students may be involved in advanced level investigations within any academic or artistic area of personal interest. In each case, the QuEST teacher facilitates student learning by guiding students' research and product development using higher level thought processes and investigative procedures. The student may spend one, two, or three years researching a topic and developing a project to be presented to appropriate audiences.
- CT History Day, Fox Video, and Community Services Projects are a sampling of additional challenging learning opportunities that may be facilitated by the QuEST teacher. QuEST students or other recommended students elect to participate in these activities.

Middle school QuEST teachers are one resource supporting the social and emotional needs of high ability learners who may, at times, encounter difficulties related to peer relations, underachievement, poor work study habits, perfectionism, over sensitivity, over excitability, asynchronous development, and lack of self-regulation.

Additionally, the QuEST teacher at each middle school serves as a resource person to all content and special area teachers throughout the building. Support may be offered through training teachers in the processes of curriculum differentiation, as well as collaboratively planning differentiated units of study. QuEST teachers may assist in finding speakers or presenters to enrich classroom study, and may serve on a variety of committees supporting middle school programming.
