

School Counseling Parent Advisory Committee

Tor Fiske, the district supervisor for the WHPS School Counseling Department, has created a School Counseling Parent Advisory Committee.

The committee consists of parents from both the Hall and Conard communities, representing each grade level at each high school. The focus of this group is to discuss upcoming changes to the Counseling department, give the department feedback and suggestions on these changes, and discuss issues within our communities concerning school counseling and guidance.

The committee met for the first time on Monday, February 1, 2016 and discussed the upcoming changes to the first year school counseling program. Each parent representative also shared different experiences and insight into the existing counseling department and addressed areas of concern as well as successful programs at each school.

The committee members for 2015-16 representing Hall's 9th-12th grades are listed below. Please feel free to reach out to them if you have questions or concerns relating to the School Counseling Department or issues that you would like to see addressed. Lastly, all families are encouraged to visit the "school counseling" section of the Hall website to review the resources there.
